PORTFOLIO

denismarginas.github.io

On this website you can check my full knowledge in the field of web development and photo-video editing through the projects listed. The website itself is fully created by me.

I have experience as a Full-Stack Web Developer on projects such as presentation websites, online shops, booking web applications, competition form applications, and SEO optimization. Additionally, I have experience as a Photo-Video Editor working on projects like ad banners, promotional offers, company logos, identity media content, and video ads. I also have freelancing experience, which is not included in this resume.
